

Developmental delay can take many forms.

A range of conditions could potentially impact a child's ability to participate, learn and grow. These conditions may include speech /language impairment, cognitive impairment, autism spectrum disorder, emotional impairment, traumatic brain injury, hearing or visual impairment, early childhood developmental delay, physical impairment or other health impairment or a specific learning disability.

There is hope.

Guidance for families with children ages birth through 5.

Inclusive child care benefits ALL children.

Including children with learning delays in a child care setting alongside children who are meeting their milestones can help develop positive self-images, friendship and social skills, problem-solving abilities and respect for others.

Early On® Michigan (Ages 0-3)

Early On provides support and resources to families with children up to age 3 who have developmental delays or are at risk for delays due to certain health conditions. Infants and toddlers who are enrolled in *Early On* reach their fullest potential, successfully transitioning to the next phase of life, with empowered and supportive families.

Build Up (Ages 3-5)

Build Up helps parents and their children ages 3 through 5 get additional educational support as they begin and continue to learn the skills needed to successfully participate in activities with same-age peers. The goal is to connect all children who may be eligible for special education services to get the support they need.
